

Chuck Toussieng is the founding board member of Richwood Scientific Inc. in Richwood, W.Va. Chuck and his wife moved to Richwood from the Los Angeles area in 2015. He has 30+ years of hardware and software experience for everything from controlling satellites to kid's games. Currently, he is teaching people in the Richwood community about code, machine learning and DNA, and paying for it by writing iPhone & iPad native iOS applications using Objective-C, Swift and Unity, along with Apple Watch app extensions. He also has done work on secure communications and HIPAA compliant apps. Prior to moving to Richwood, Chuck was involved in a number of high tech ventures and businesses.

Chuck's personal passion projects include anything computer vision related, general machine learning, Arduino, Raspberry Pi, Aviation, Hackable Medical Devices, Remote Sensing and Game Engines. And, his specialties include launching products using novel solutions. Chuck also has iOS expertise in Multipeer Connectivity, Mapping, Networking, APNS, IM, VoIP, and iOS background subtleties...as well as Unity experience creating Augmented Reality, educational and enterprise content on iOS.

Chuck also is a member of the Richwood City Council and is an avid outdoor recreationalist and photographer.
